Message from the Guest Editors

Dear Colleagues,

Workplace Health Management (WHM) is a holistic strategy to protect, promote, and manage employees' health at work and thus is similar to the Total Worker Health approach in the USA. With this Special Issue, we aim to highlight and summarize examples of good practice and future implications in the international research of WHM. With regard to examples of good practice, we welcome both manuscripts on integrative approaches and those addressing the four WHM pillars: Occupational Health and Safety, Operational Reintegration Management (Return to Work), Workplace Health Promotion and Personnel Development. We hope for contributions addressing a holistic WHM, as well as those from the one of the four pillars and, at best, with a linkage between the pillars. However, if possible, behavioral as well as environmental preventive aspects should be addressed.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
