Message from the Guest Editor

Gestational diabetes mellitus (GDM), the mild to severe glucose intolerance, emerging later in pregnancy, reflects the underlying instances of diabetes mellitus (DM) in any population. An in-depth knowledge of the epidemiology of GDM in different countries and regions will help to understand the disparities and similarities facilitating international comparisons. A snapshot of the epidemiology of GDM in select countries will help us march towards our ultimate goal: decreasing maternal and fetal complications in pregnancy and DM in the entire population worldwide.

Papers addressing the epidemiology of GDM (reviews, position papers, brief reports, commentaries) in different countries/continents are invited for this Special Issue.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
