Deadline for manuscript  
submissions:

**closed (30 April 2023)**

### Message from the Guest Editor

Human health has always been influenced intricately by the environment (including the earth, water, soil and air), and socioeconomic conditions (such as influencing the patient's choice of medical treatment). In recent years, the interdisciplinary integration of geography has provided a new track for elucidating the health problems related to the natural and social environment. We will accept manuscripts about multidisciplinary environmental health research for this Special Issue. Here are some recommended topics, though other topics are also welcome:

1. Spatial analysis technology and human health.
2. Technology integration in environmental health research.
3. Environmental pollution and ecological risks.
4. Interdisciplinary research on environmentally associated diseases.
5. Health risk prediction.
6. Characteristics of patients' mobility for seeking medical care.
7. Tracking major public health emergencies.
8. 3D simulation of geographic entity and non-geographic entity of resources and environment.
9. Ecological health evaluation system.
10. Disaster monitoring and assessment.

## Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (Public Health, Environmental and Occupational Health)
