Deadline for manuscript
submissions:

30 April 2025

Message from the Guest Editors

This Special Issue seeks papers on workplace health promotion models and approaches with diverse population groups. We are interested in submissions about diverse population groups, including (but not limited to) people with disabilities, people with mental health and chronic health conditions, First Nations communities, culturally and linguistically diverse communities (including people from refugee backgrounds), LGBTIQ+ people, people impacted by the justice system, and groups historically excluded from the labour market. Manuscripts could present on organisational structures that promote well-being, particular intervention models, and some of the current challenges and opportunities that diverse populations experience with respect to their health and well-being in the workplace. Papers could also present on innovate ways to co-design workplace health-promotion settings with diverse population groups and an intersectional perspective. Theoretical, perspective, and empirical papers are all welcome.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
