Message from the Guest Editors

In this Special Issue we propose to consider community-based interventions that impact on child health and well-being around the globe. In addition to rural community-based initiatives, given that most children now live in cities, we are also interested in urban initiatives. Although Sustainable Development Goal 3 is our primary focus, we are keen to hear about multi-sectoral interventions with a synergistic impact across the SDGs.

Dear Colleagues,

I have accepted the offer to Guest Edit a Special Issue of the *International Journal of Environmental Research and Public Health* (where we have been publishing some of our Nepal injury work) devoted to community child health initiatives. We invite contributions arising from child-focussed, community-based initiatives that may be multisectoral—especially urban-based initiatives.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
