Message from the Collection Editors

The increased attention to the importance of health literacy for quality of life, health care, disease prevention, and health promotion has led to a growth in the global health literacy community. Health literacy plays an essential role in accelerating sustainable development. Recognizing that health literacy is two-sided—focusing on both the individual skills as well as the competence of systems and organizations to meet people’s needs—this issue offers an opportunity to publish high-quality, interdisciplinary research reporting on topics relating to global health literacy developments from all parts of the world and within a wide range of settings. We welcome manuscripts specifically focusing on health literacy and global health, international health, SDGs, health behaviors, health outcomes, quality of life, the emergence of respiratory virus infection, noncommunicable diseases, health promotion, disease prevention, health care, health systems, health advocacy, health policy, health communication, capacity building, organizational development, co-production, interventions, cultural competency, eHealth, and innovations for future health.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
