Deadline for manuscript  
submissions:

**closed (13 April 2023)**

### **Message from the Guest Editor**

Dear Colleagues,

Environmental degradation and the excessive use of natural resources have become global concerns. Thus, stringent legislative measures have been proposed to promote green transformation. However, with the economy contracting due to COVID-19 and regional conflicts, there is a growing realization that we need to find the best trade-off between environmental protection and economic growth, especially in developing countries, to achieve a sustainable environmentally friendly economy. Therefore, adopting optimization methods to realize an optimal complete transmission belt from global policies to operational activities is absolutely necessary. As an important pillar of basic industry, the manufacturing and service industry has become the main object of attention with regard to achieving green transformation. We invite cutting-edge researchers to submit original and review articles on the theme of optimization in green transformation for advanced manufacturing and the modern service industry, especially those combining a high academic standard coupled with a practical focus on providing optimal solutions for green transformation.

## Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (Public Health, Environmental and Occupational Health)
