Prof. Dr. Ramon Firmino

Academic Unit of Biological Sciences, Federal University of Campina Grande, Patos 58708-110, PB, Brazil

Deadline for manuscript submissions:

31 January 2025

Message from the Guest Editors

Dear Colleagues,

For this Special Issue, we are seeking submissions exploring the factors associated with Oral Pain and Oral Health-related consequences.

The consequences of oral pain expand far beyond the symptomatic domain, including difficulty chewing, decreased appetite, weight loss, sleep disturbances and behavioral changes, which can affect school and work performance, negatively impacting the patient's quality of life. The parents of children experiencing toothache may also experience psychological consequences such as feelings of guilt and shame.

Oral pain is also an indicator of severe disease that has been neglected, which can eventually lead to decreased productivity, work absenteeism and higher treatment costs for patients, the government and health insurance companies. Identifying factors associated with oral pain is pivotal for guiding clinical decisions, preventing oral health problems and improving public health policies.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
