Message from the Guest Editor

Oral diseases, such as dental caries, periodontal disease and tooth loss, present a major public health burden in the world. Furthermore, as the population ages, the deterioration of oral function becomes an additional issue.

Public health activities are essential to the addressal of these challenges. Additionally, epidemiological findings are necessary for evidence-based public health policy.

Hence, this Special Issue aims to focus on epidemiological evidence contributing to public health policy for children, adolescents, adults and older people, as well as on research into the factors associated with regional differences, as well as their associated and individual aspects in the status of oral health. Novel research articles and reviews are welcome.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
