Message from the Guest Editors

This Special Issue focuses on health economics, social policy, and health management and aims to provide managers and policy makers with current knowledge regarding useful insights into how healthcare can be organized and financed and a framework to address a broad range of issues in an explicit and consistent manner. Additionally, papers explaining social phenomena that shape the health status of the population, social security, working conditions, inequalities, social discrimination and European and international health policies, modern methodological funding techniques, compensation methods, cost-benefit analysis, cost-effectiveness, utility costs, and cost minimization are encouraged. Papers following the application of quantitative, qualitative or mixed-methods approaches will be considered. We hope to be an open communication space that enhances dissemination and exchange of knowledge to a wider audience.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
