Message from the Guest Editors

This Special Issue will focus on improving understanding around the interrelationship of gender, violence, and health, as experienced by women in low- and middle-income countries. We invite contributions which expand our knowledge of, and provide new insights into, the intersections of gender, violence, and health. We particularly welcome qualitative research articles, papers that draw inferences based on longitudinal data, multi-country study analyses, papers that advance understanding of the intersections among vulnerable and often-marginalized groups, and papers that combine clinical/biological and epidemiological data.

Keywords: gender-based violence; violence against women; sexual violence; rape; health impact; mental health; HIV; sexual and reproductive health; health system responses; treatment of women

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
