Message from the Guest Editor

During the past decade, the opioid epidemic has fueled an increase in people who inject drugs (PWID), shaping new geographies of HIV/HCV-related risk in the U.S. and abroad. Special Issue of the International Journal of Environmental Research and Public Health, on the "Emerging Geographies of Opioids and HIV/HCV: Services, Responses, and Prevention", offers an opportunity for multi-disciplinary researchers to come together and bring new understanding to the evolving opioid crisis and its relationship to emerging geographies of HIV/HCV-related risk, health services research and response. To frame the development of effective policy interventions, it is critically important that the interconnected opioid and HIV/HCV epidemics be better understood. along geographically-varying responses, services, and prevention activities. We are particularly interested in research related to increasing trends in HIV/HCV-related opioid risk and responses (both public policy and new research initiatives) within non-urban communities (i.e., suburban and rural areas).

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase,

GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
