submissions:

closed (30 April 2022)

Message from the Guest Editors

The *IJEPHR* invites submissions to this Special Issue focused on research investigating the mental and physical health and social outcomes of human–animal interactions (including living with companion or assistance animals; AAT; AAA; AAE, and interactions with non-domestic animals/wildlife). Topics can include—but are not limited to—issues at the forefront of public health concern (e.g., social isolation and loneliness, mental health, addiction, obesity and heart health), with a particular (but not exclusive) interest on work considering the role of HAI in the context of the COVID-19 pandemic. Studies that include perspectives related to animal welfare and behaviour as part of their investigative remit are particularly welcome. Contributions may be quantitative, qualitative or opinion pieces.

We very much look forward to receiving your submissions.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
