Message from the Guest Editor

Dear Colleagues,

Public health systems worldwide have been under tremendous pressure during the COVID-19 pandemic and other crises to deliver timely and appropriate services despite the ever-changing circumstances and high degree of complexity related to the pandemic. This special issue focuses on the lessons learned and the challenges encountered during the rapid transformation required. The aim is to develop a special issue that informs and supports the future of public health. Therefore, papers presenting new research, discussions and reflections on how to safeguard public health functions for health and wellbeing while remaining agile, people-centred and aligned with values such as universal access to health during emergencies are welcomed. Areas of interests include e.g. organizational change, use of new technologies and innovations, investment in public health literacy, communication and provision of information to the public, interventions and approaches to cover the full spectrum of health including physical, mental, and social health, and reach-out to people in vulnerable situations.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
