Message from the Guest Editor

The Special Issue seeks novel contributions in cost-effectiveness analyses of health service interventions. We seek studies that expand the knowledge of cost-effectiveness analyses in various aspects, such as data (e.g., record linkage data), stakeholders (e.g., the involvement of end-users), and reporting standards (e.g., a new checklist for cost-effectiveness studies). This Special Issue also encourages other types of studies on cost-effectiveness analyses, including theoretical frameworks and critical reviews of current practices.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
