Applied Psychology, School of
Medicine, University of
Nottingham, Jubilee Campus,
Nottingham NG8 1BB, UK

Deadline for manuscript
submissions:

closed (11 September 2020)

Message from the Guest Editor

This issue aims to contribute to our understanding of emerging work-related risk factors for the health and well-being of healthcare staff and the effectiveness of interventions to tackle them. There are a wide range of different professionals and job roles within the healthcare workforce, and we welcome research articles across the full spectrum of these. Of specific interest are articles on topics such as the identification, assessment and management of workplace risks for healthcare staff; the influence of working condition on work-related health and other related outcomes (e.g., turnover, absence, engagement); the design of healthy and engaging work for healthcare staff; the evaluation of interventions to improve the health of healthcare workers; and the use of novel research methods to understand the health of healthcare workers.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
