Message from the Guest Editors

Dear Colleagues,

This Special Issue will deal with an underestimated but crucial theme for human health. In the most economically developed countries, people spend up to 95% of their lifetime in indoor environments, among which dwellings play a major role. In developing countries, considerable levels of indoor pollution make housing unsafe, with a remarkable impact on the health of inhabitants. It is thus clear that all the above-mentioned considerations highlight housing as a key determinant of health for people worldwide. I hope that this Special Issue will represent an effective and evidence-based instrument for researchers, public health operators, and lawmakers and public administrators to rethink and better organize their policies and regulations in order to protect human health on local, national, and international scales.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
