Deadline for manuscript  
submissions:

**closed (29 February 2024)**

### **Message from the Guest Editors**

Dear Colleagues,

In this Special Issue, we seek to focus on populations who suffer a disproportionate burden of reproductive and maternal morbidity and mortality, but who often remain unseen. We intend to represent the entire reproductive span, as well as broad and long-term maternal health outcomes such as mental health, birth trauma, and health care utilization. We hope to dialog across communities, countries, and regional boundaries to describe new approaches to identifying and measuring the needs of these populations. We especially endeavor to bring forward ‘lessons learned’ from novel interventions. We invite the submission of your current research, review articles, or commentary.

## Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (Public Health, Environmental and Occupational Health)
