

Hygiene and Environmental Health: Strategies and Actions Plans to Prevent the Public Health Hazards

Guest Editors:

Dr. Gea Oliveri Conti

Prof. Dr. Zhanhui Wang

Prof. Dr. Margherita Ferrante

Deadline for manuscript
submissions:
closed (10 August 2023)

Message from the Guest Editors

To promote the environment and public health, both of which are mandatory for sustainable social and economic development, applied research on this topic is obligatory to ensure we have sufficient knowledge regarding prevention, from natural risks to industrial, anthropic, and climatic risks.

A "One health"-based applied research approach is the first step towards better support for public health hazard minimization or deletion. Global warming, precision medicine, epigenetic, veterinary medicine, food safety and control of emerging environmental risks results, such as nanomaterials, will be discussed in this Special Issue.

Research on governance, surveillance, monitoring and evaluation, prevention and health promotion are welcome. Studies on preventable noncommunicable and communicable disease, premature death and avoidable disability are also encouraged.

- environmental health
- public health
- health hazard prevention
- One Health
- prevention strategy
- action plans

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
