Deadline for manuscript  
submissions:

**closed (30 June 2021)**

### **Message from the Guest Editor**

Dear Colleagues,

We are organizing a Special Issue on "Infectious Diseases & Epidemiology" (IJERPH, IF 2.468, ISSN 1660-4601). Details about submission dates and all technical details are provided. In these difficult times with pandemic and crises in many sectors epidemiologic evidence for public health purposes is especially important. We hereby invited all interested scientists and public health workers to submit papers. Do not forget that infectious diseases can be much more than Covid-19! In these times we discover that very simple rules about hand washing and distance keeping are extremely effective in prevention of other infectious diseases, e.g., the annual flu coming to all of us. This special issue can shed light on and provide new insight in the complicated game between the human race and their microbial surroundings.

Prof. Dr. Jon Øyvind Odland

## Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (Public Health, Environmental and Occupational Health)
