Department of Medicine, Section of Infectious Diseases and Global Health, University of Chicago, Chicago, IL 60637, USA

Dr. Elizabeth Salisbury-Afshar

School of Medicine and Public Health, Department of Family Medicine and Community Health, University of Wisconsin Madison, Madison, WI 53715, USA

Deadline for manuscript submissions:

closed (31 December 2022)

Message from the Guest Editors

This Special Issue seeks to explore innovations in care and services for people who use drugs, with particular focus on advancing new approaches to implementing evidence-informed interventions. This may include non-traditional venues for clinical/integrated care delivery, hospital-based substance use treatment and harm reduction service delivery, overdose prevention sites, drug checking services, and peer-led approaches. Interventions serving under-researched populations, including highly marginalized, minority, and/or rural communities, are of special interest. This call includes approaches that embrace harm reduction and extend beyond traditional measures with the vision of providing holistic care and advancing the well-being of those who use drugs.

A 100% special discount is available for the contribution in the Special Issue (0 CHF instead of 2500 CHF per accepted paper). If you are interested in contributing, welcome to **send the planned paper abstract to <sherry.cao@mdpi.com> by 30 November 2022 for the waiver consideration.**

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
