

Innovation in Environmental Protection and Public Health: Social, Economic and Ecological Approaches

Guest Editors:

Prof. Dr. Józef Ober

Dr. Piotr Sakiewicz

Prof. Dr. Krzysztof Piotrowski

Deadline for manuscript
submissions:
closed (31 May 2023)

Message from the Guest Editors

Innovation is pervasive in all industries and throughout society. Innovative actions can affect public health and have the potential to reduce environmental pollution, energy, water, and fuel use. Such activities are overwhelmingly consistent with the philosophy of sustainable development and can be considered from social, economic, and environmental perspectives.

Research conducted in both urban and rural areas in developing and developed countries can provide valuable insights into environmental protection and public health in the context of innovation. This Special Issue is open to all topic areas related to the environmental and public health impacts of innovation.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
