Deadline for manuscript  
submissions:

**closed (30 April 2021)**

### Message from the Guest Editors

The field of rehabilitation medicine is changing at a rapid and unprecedented rate, as novel health technologies that are capable of augmenting the standard of care for a multitude of conditions are entering the market. Despite the dearth of promising new technologies, health professionals are struggling to keep up with the technical, legal, and practical issues surrounding the integration of new technologies into common clinical practice. It is this nexus of health technology entrepreneurship and pragmatic clinical care that we wish to explore in this Special Issue. We will be exploring research that highlights how innovative technologies are creating new treatment options for conditions where few treatments were previously available, but also how more simple technology interventions can be seamlessly integrated into a clinical workflow. This Special Issue will be a meaningful step forward in empowering health professionals and researchers alike to create and employ innovative technological interventions in the field of rehabilitation medicine and beyond.

## Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

*IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (Public Health, Environmental and Occupational Health)
