Message from the Guest Editors

Dear Colleagues,

The integration of care holds the promise to create a sustainable organisation of care and improve patient and organisational outcomes. All over the world, countries are faced with the challenges of an ageing population and a tremendous rise in the prevalence of chronic diseases and multimorbidity, whilst on the other hand, healthcare expenditures need to be contained. In recent decades, many integrated care models and interventions have been designed to deal with these challenges. However, as of today, the evidence that integrated care leads to improved outcomes is scattered and contradictory. Although still a promising approach, integrated care has thus been criticised for its lack of comprehensiveness. This Special Issue addresses these topics with the aim to advance our knowledge on advances in integrated care models and interventions that improve care delivery and outcomes for patients, health professionals, and/or informal caregivers. Research papers, reviews, and case reports dealing with these advances are welcome.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
