Message from the Guest Editor

This Special Issue of International Journal of Environmental Research and Public Health (IJERPH) focuses on how cannabis, alcohol and other addictive drugs cause violence. In the preceding years, death rates have increased drastically in relation to vehicular crashes, domestic abuse, homicides and suicides. This includes the consideration of mass attacks and other violent acts in relation to drugs and alcohol. We invite scholars to submit papers related to all aspects of cannabis, methamphetamines, hallucinogens, alcohol and other addictive drugs. These submissions can include observational work, conductive research, and reviews of peer-review or grey literature. It is our hope hope researchers and scholars will view this opportunity as one to extend open and free academic communication focused on public health world-wide, for which we all strive for.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
