Deadline for manuscript
submissions:

closed (31 January 2024)

Message from the Guest Editor

The presence of hazardous contaminants, defined as any dangerous substance or compound undesirable for living beings in the environment, is a growing global concern for all environmental compartments. Their appearance and persistence in air, soil and water can negatively impact biota and lead to a decrease in quality and overall environmental health. For this Special Issue, different types of papers (articles, reviews, communication, etc.) able to expand the knowledge on this topic at regional, national or world levels are welcome.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
