Deadline for manuscript
submissions:

closed (31 July 2023)

Message from the Guest Editors

The number of surgical operations performed worldwide is continuously increasing, and surgery is entering more and more areas traditionally reserved for conservative treatment. Proper postoperative pain control, early mobilization of the patient and postoperative rehabilitation are now cited as the primary factors comprising the success of modern surgical treatment, directly translating into three important functions: hospitalization time, costs and patient satisfaction. Thus, focusing on a comprehensive understanding of pain, acknowledging the importance of pain monitoring and providing effective treatment are vital issues.

If you are interested in broadly understood perioperative medicine and have conducted research in this field, we encourage you to submit the results of your study. We believe your contribution can help anaesthetists to improve perioperative care.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
