submissions:

closed (28 February 2023)

Message from the Guest Editors

The COVID-19 pandemic and climate change have highlighted the importance of robust health systems for achieving health security. While perhaps our focus has been on the infectious disease emergency, the need for strong and resilient health systems is just as important to address the growing non-communicable and injury challenges—and more broadly their environmental, social and economic determinants, we, as a global community, face.

It is these, and related aspects of health development, this special edition of *IJERPH* will explore. With such a premise, submission on topics including, but not limited to, the following are welcome:

- Tropical medicine and public health;
- Health service delivery and models of care;
- Health system financing, social protection, and insurance;
- Health workforce;
- Social inequity and health;
- Digital health;
- Health information systems and management;
- Data for decision-making;
- Decolonising global health.

Lane, Baltimore, MD 21251, USA

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
