Land System – Ecological Process Interactions

Guest Editors:

Dr. Erqi Xu

Institute of Geographical Sciences and Natural Resources Research, Chinese Academy of Sciences, Beijing 100101, China

Dr. Xiaobo Hua

College of Humanities and Development Studies, China Agricultural University, Beijing 100083, China

Deadline for manuscript submissions: closed (31 December 2022)

Message from the Guest Editors

The utilization of land resources is a process which profoundly changes the natural environment. It is not only an important part of global change, but also an important factor driving global change. Therefore, the impact of land system changes on the ecosystem and environment, as well as their response to land changes, are important issues in the academic community. Land systems include not only the natural complex including geology, landform, climate, hydrology, soil, vegetation, etc., but also the impact of past and current human activities on the natural environment. As a typical complex system, land reflects the multifaceted interactions between human social and economic activities and biogeochemical processes.

This Special Issue of *International Journal of Environmental Research and Public Health (IJERPH)* focuses on the current state of knowledge on the interactions between land system and ecological process. New research papers, case reports, and reviews of advances in methods, applications, and evidence are welcome to this Issue.

Message from the Editor-in-Chief

Prof. Dr. Paul B. Tchounwou

RCMI Center for Urban Health Disparities Research and Innovation, Richard N. Dixon Research Center, Morgan State University, Baltimore, MD 21251, USA Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
