Tackling Long-Term Care Needs in Ageing Societies in (Post) Pandemic Times: Multidisciplinary Research Approaches in an International Perspective

Guest Editors:

Prof. Dr. Aviad Tur-Sinai

Department of Health Systems Management, The Max Stern Yezreel Valley College, 1930600 Jezreel Valley, Israel

Dr. Giovanni Lamura

IRCCS INRCA—National Institute of Health and Science on Ageing, Centre for Socio-Economic Research on Ageing, 60124 Ancona, Italy

Dr. Alexandra Lopes

Department of Sociology, University of Porto, 4099-002 Porto, Portugal

Deadline for manuscript submissions:

closed (6 April 2023)

Message from the Guest Editors

This Special Issue, *Tackling Long-Term Care Needs in Ageing Societies in (Post) Pandemic Times: Multidisciplinary Research Approaches in an International Perspective*, seeks theoretical and empirical papers that deal with long-term care challenges at the local, national, and international level and possible strategies for addressing them. Submissions may investigate policy issues with regard to the role played by public and private (including profit and non-profit) stakeholders in this field and also analyze how dynamics and interactions may be changing to take into account the impact of the COVID-19 pandemic. Papers may also consider how worldwide phenomena like rising life expectancy and population aging might challenge societal arrangements and healthcare systems throughout the developed world. Longevity is one of the greatest achievements attained in the recent past due to scientific, social, and technological progress, and papers focusing on the analysis of longevity patterns and their relationships with health, social, and long-term care aspects are welcome. We particularly encourage authors to submit comparative papers and articles from low- and middle-income countries.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
