Message from the Guest Editor

Dear Colleagues,

Pulmonary rehabilitation is recognized as a core component of the management of patients with chronic respiratory diseases and has been demonstrated to be effective mainly in COPD patients, but also in others with respiratory diseases improving symptoms, exercise tolerance, and quality of life.

Pulmonary rehabilitation is related to respiratory health, as well as other aspects such as smoking cessation, indoor and outdoor air pollution, respiratory infections, physical activity, nutrition, and maintaining a healthy weight. Many of these are related to public health as well, as we have seen, for example, with the recent COVID-19 pandemic, meaning that respiratory and public health are intrinsically linked.

In this Special Issue of the *International Journal of Environmental Research and Public Health*, we are going to focus on these aspects related to respiratory and public health and pulmonary rehabilitation in respiratory diseases and offer an opportunity to publish multidisciplinary research and reviews related to them.

We encourage you to send your manuscripts and contribute with them to the success of this Special Issue.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase,

GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
