Deadline for manuscript  
submissions:

**closed (31 July 2024)**

### Message from the Guest Editor

Male reproductive health is a branch deeply connected with public health, associated with various problems, both in developing and western countries. Similarly, urology is a branch that treats widely diffused pathologies, both in the young/pediatric population and in the elderly population, such as urolithiasis, BPH, and genitourinary cancers. These diseases lead to countless treatments and hospitalizations, which, especially in public health emergencies, such as that experienced over the last two years, represent a huge problem that may no longer be sustainable by most healthcare systems in the future.

In this regard, this Special Issue is open to any subject area related to the impacts of the built environment on public health. This includes technological and pharmacological advances, both in the andrological and urological fields, that can bring benefits, in terms of reduced hospitalization, but also a simple improvement in the quality of care and patients' outcomes.

## Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (Public Health, Environmental and Occupational Health)
