submissions:

31 August 2024

Message from the Guest Editor

This Special Issue focuses broadly on the various ways in which pharmacists contribute to medication safety across different care settings (e.g., community pharmacy, hospital, and home care). This includes not just the strategies listed, but also the education of pharmacy students, postgraduate trainees, and practicing pharmacists. It also includes newer strategies such as utilizing pharmacist expertise to engage patients in medication self-management using patient-facing or patient-centered tools and technologies (e.g., patient portals, and mobile health applications). Innovative strategies including pilot efforts with small sample sizes and limited statistical power, or those that are primarily descriptive in nature are also welcome. A particular focus will be placed on submissions describing the translation of known effective strategies for ensuring medication safety to underserved/under-represented patient populations and/or developing countries.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
