submissions:

**closed (28 February 2021)**

### Message from the Guest Editors

It is well-established that agriculture is a hazardous industry; however, much of the focus to date has been on the physical risks. The mental health of people working in agriculture (e.g., farmers, ranchers, farm workers, and agribusiness) remains an important gap in knowledge. This Special Issue will focus on the mental health experiences of farmers, ranchers, and agricultural workers.

Articles in this Special Issue will relate to the large scope of mental health in agriculture. This could include but is not limited to original research on prevalence, risk/preventative factors, and/or interventions (e.g., curriculum, training), literature and/or systematic reviews and meta-analyses, and other types of studies. Articles could be qualitative, quantitative, or mixed methods in nature.

an Open Access Journal by MDPI

## Editor-in-Chief

**Prof. Dr. Paul B. Tchounwou**

## Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (Public Health, Environmental and Occupational Health)
