Message from the Guest Editors

After the occurrence of any major natural or human-induced disaster, significant impacts on the mental health and psychological status of the, perhaps, thousands of evacuees and/or affected residents often emerge.

The Great East Japan Earthquake (GEJE) occurred in March 2011. Subsequently, a massive tsunami and nuclear power plant accident forced the long-term evacuation of thousands of residents. The GEJE is but one of the large-scale disasters which have occurred intermittently and globally, e.g., earthquakes, hurricanes/typhoons, floods, and human-made disasters. Hence, in order to learn lessons and improve preparedness for upcoming disasters, the integration of global and national efforts to support disaster-related mental health activities and research is receiving more attention.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
