Message from the Guest Editor

Dear Colleagues,

This Special Issue of *International Journal of Environmental Research and Public Health* (*IJERPH*) aims to further the knowledge about mental health in the workplace through the lens of the COVID-19 pandemic. The Issue seeks to explore lessons learned from the COVID-19 pandemic that inform and shape our knowledge of workplace mental health priorities, strategies, initiatives, approaches and tools across a variety of sectors, work environments and worker groups. Accepted manuscript types include original research articles, reviews, brief reports and commentaries. Papers that discuss the design, implementation and evaluation of organizational interventions are encouraged, as are cost–benefit analyses and theoretical papers that provide guidance on how to develop effective mental health strategies in specific workplace sectors, environments or groups.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.
Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
