### Message from the Guest Editors

The central goal of this issue is to generate recent collections that would help update the current status, tackle mental health issues, re-shaping the existing services, and provide effective preventive measures. Participants are encouraged from social sciences (psychology, sociology, pedagogy) and medical sciences. All submissions in line with our central goal are welcome, including original cross-sectional and longitudinal studies, systematic reviews and meta-analysis studies. The output of this topic would profoundly affect the status of a preexisting mental condition in healthy individual, clinical samples, and health care professionals.

Deadline for manuscript submissions:

**closed (31 October 2022)**

## Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.
