Deadline for manuscript submissions:

**closed (30 September 2022)**

### Message from the Guest Editors

Motor competence is a growing area of research due to its positive association with a plethora of health and developmental-related outcomes. The development of motor competence is the foundation for lifelong engagement in physical activity and sport, and it is known that early life experiences are essential to build strong motor and neurodevelopmental trajectories and to adopt healthy lifestyles.

This Special Issue on Motor Competence in Children and Adolescents is an opportunity to push forward scientific knowledge by addressing research gaps and by postulating future research questions aiming to improve our understanding of health, growth, and developmental-related associations and determinants of appropriate levels of motor competence.

## Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (Public Health, Environmental and Occupational Health)
