Deadline for manuscript submissions:

**closed (30 September 2021)**

### Message from the Guest Editors

The current world pandemic, COVID-19, has no precedent. The human race is socially/physically isolating in an attempt to flatten the curve of the viral incidence and to save lives. People are flocking to nature to find solace and protection from the rapid transmission of the virus in the cities only to learn they may only find respite sheltering in their residences. Human isolation has a plethora of psychological, physiological and spiritual implications. Nature spaces, green and blue, are limited due to the sheltering-in-place mandates and are needed more than ever to provide antidotes for human anxiety, fear of the unknown, loneliness, decreased immunity, and other health issues. Mindfulness is known for its multitude of benefits: increased immunity, connection with self, decreased anxiety and depression, and increased well-being.

During these uncertain and stress-filled times it is necessary to make an urgent call to contribute to this Special Issue in an effort to distribute empirical findings to assist practitioners and researchers in learning ways to assist people living during a pandemic.

## Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (Public Health, Environmental and Occupational Health)
