Health and Well-Being Related to New Family Forms: Perspectives of Adult Individuals, Couples, Extended Family Members, Children, and Professionals

Guest Editors:

Prof. Dr. Dorit Segal-Engelchin

The Spitzer Department of Social Work, Ben-Gurion University of the Negev, Beer Sheva 84105, Israel

Prof. Dr. Orit Taubman-Ben-Ari

School of Social Work Faculty of Social Sciences, Bar-Ilan University, Ramat-Gan 5290002, Israel

Message from the Guest Editors

Over the past four decades, within most Western societies, the traditional family comprised of a married heterosexual couple and their genetically related children has given way to an array of new family configurations. The ever-growing diversity of new family forms encompasses, among other things, intentionally child-free families, single-parent-by-choice families, families created by elective co-parenting arrangements, families headed by LGBTQ parents, families created through reproductive donation (e.g., sperm, egg, or embryo donation), and surrogacy families.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
