Deadline for manuscript  
submissions:

**closed (1 October 2020)**

### Message from the Guest Editors

Dear Colleagues,

This special issue is devoted to pushing forward both the basic and applied science of suicide prevention by targeting novel studies that investigate suicide protective factors and resilience. We are also interested in work that tests new interventions, or furthers the empirical evaluation of some of the current leading therapeutic interventions. Studies of interest may utilize quantitative, qualitative, or mixed-methods approaches; moreover, they may be drawn from a number of disciplines. However, studies must either address (1) the identification of novel protective factors, and/or (2) testing an empirical intervention. Specific example topics can be found at: [https://www.mdpi.com/journal/ijerph/special\\_issues/Novel\\_Approaches\\_Suicide\\_Prevention](https://www.mdpi.com/journal/ijerph/special_issues/Novel_Approaches_Suicide_Prevention)

While this special issue is open to any type of article, priority will be given to rigorously designed empirical, over theoretical or review, articles.

## Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

*IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (Public Health, Environmental and Occupational Health)
