Message from the Guest Editors

Dear Colleagues,

Mental health is the single largest burden of non-fatal health problems, and is an important cause of presenteeism, absenteeism, unemployment, long-term disability, and lower productivity. Burnout is a representative occupational phenomenon included in the 11th revision of the International Classification of Disease. In particular, in the recent pandemic, it is known that the mental health of many essential service workers, including healthcare workers, is severely threatened.

Promoting mental wellbeing and a healthy workplace is not just a moral obligation but also a good investment for employers. In this context, evidence-based mental health promotion policy has become an important issue for healthy local communities and workplaces.

This Special Issue invites highly qualified papers, especially those combining academic challenges coupled with a practical focus on providing optimal mental health promotion or preventing burnout.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
