Message from the Guest Editor

The topic covers the problem of chronic wounds (diabetic ulcer, pressure ulcer) which affect patients' life quality and require long-term treatment and care. Additionally, the management of postoperative wounds is an important integral part of the surgical treatment, especially in plastic surgery procedures. There are many topical adjunctive therapies (lasers, mesotherapy, platelet rich plasma, botulin toxin injections) that can be used to enhance wound healing and result in more aesthetically pleasing scars. Similarly, there are many different dressings and methods of wound closures. The efficacy of these techniques is still a subject of ongoing debate and research, while the problem of chronic wounds is of interest for different healthcare providers and public health.

This Special Issue is open to the subject area of different aspects of wound healing and management; prophylaxis, treatment, and consequences of chronic wounds; and all other medical aspects of wounds. The keywords listed below provide an outline of some of the possible areas of interest.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
