Message from the Guest Editors

Occupational health is a matter of workers' basic human rights and fundamental interests. With the increase in the level of industrialisation in countries around the world, the total amount of economic development has grown significantly, yet the number of production safety accidents and the rate and total incidence of occupational diseases such as pneumoconiosis have not been effectively curbed. Therefore, in attempt to exchange information and ideas on occupational health, new research papers and reviews covered various research areas like safety psychology, safety behavior, risk perception, accident prevention and control as well as dust control and environmental health are welcome. Especially, papers dealing with approaches such as safety management or safety human factors and ergonomics to improve occupational health. This special issue is open to any subject area related to occupational health, the listed keywords suggest are only partial.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
