### **Message from the Guest Editor**

Dear Colleagues,

The oral health of the elderly patient is of great importance to the geriatric patient. This Special Issue will focus on fixed and removable prosthetic rehabilitation, on the masticatory efficiency of the edentulous patient and post-surgical defects, on the use of new technologies in prosthetic rehabilitation and on the use of new biomaterials and nanomaterials. Increased life expectancy requires constant updating and development of oral rehabilitation methods that can guarantee the wellbeing of the elderly patient. Full papers of original articles and review articles are welcome.

## Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.
