submissions:

closed (31 December 2020)

Message from the Guest Editors

We are organizing a Special Issue on psycho-criminology, crime, and the law in the International Journal of Environmental Research and Public Health. This peer-reviewed scientific journal publishes original articles, critical reviews, research notes, and short communications in the interdisciplinary area of environmental health sciences and public health.

This Special Issue focuses on the application of psycho-criminological approaches and constructs to crime, criminal and civil law, and the influence of law on behavior. This is to explore how individual criminal behavior is acquired, evoked, maintained, and modified through personality, social, and/or environmental influences. Contributors from criminology, criminal justice, psychology, psychiatry, sociology, legal, forensic sciences, genetics, public health, and allied fields. From a public health perspective, the key aim of this Special Issue is to advance our understanding of psycho-criminological mechanisms (i.e., personal, social, and environmental influences) associated with different criminal behavior in the intersections of the law.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
