### Message from the Guest Editors

Early childhood is a critical period in the development of social-emotional skills. Young children's social-emotional development relates to other developmental areas. As such, early childhood programs and interventions that emphasize or target children's social and emotional learning are gaining attention in research and practice. However, children's social-emotional development is not necessarily linear, and it is culturally relevant. Therefore, caution needs to be taken when a practice is considered evidence-based to avoid implicit bias towards a specific culture. This Special Issue is focused on the programs, interventions, strategies, and practices that demonstrate support for children's social-emotional learning and development across the early childhood epoch (ages 0–8 years) within different cultural contexts. The impact of the pandemic on children's social-emotional development is also addressed.

Deadline for manuscript  
submissions:

**31 October 2024**

## Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (Public Health, Environmental and Occupational Health)
