### Message from the Guest Editor

Dear Colleagues,

Adequate nutrition is critical during the perinatal period of pregnancy and lactation, in order to support both the health of mothers and their infants. Multiple complications of pregnancy can be prevented or alleviated with proper nutrition, resulting in improved birth outcomes. Similarly, promoting appropriate nutrition and growth during the neonatal period is essential for supporting both acute and long-term health. This Special Issue aims to provide selected contributions on enhancing the understanding of perinatal/neonatal nutrition status and its relationships with health outcomes; therapies or interventions to improve perinatal/neonatal nutrition status or neonatal growth. Potential topics include, but are not limited to:

- The evaluation of maternal dietary intake during pregnancy or early lactation;
- Nutrition interventions during pregnancy or early lactation;
- Nutritional evaluation of human milk in the neonatal stages of lactation;
- Nutrition interventions in preterm or low-birth-weight infants or hospitalized neonates;
- Evaluation of neonatal growth;
- Evaluation of nutrition status or neonatal growth;
- Perinatal or neonatal nutrition interventions.

## Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (Public Health, Environmental and Occupational Health)
