Message from the Guest Editor

In this Special Issue, we will explore special challenges to physical activity and proper nutrition in communities that are marginalized by borders, socioeconomics, race/ethnicity, and other similar factors. Physical inactivity and poor nutrition are problems that are ubiquitous among the marginalized, yet research on this topic often overlooks the difficulties these populations face to maintain a proper energy balance. The aim of this Special Issue is to highlight these challenges in a collection of scientific works that reflects both these unique circumstances of marginalized populations as well as potential solutions for alleviating them.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
