Deadline for manuscript submissions:
closed (30 April 2023)

Message from the Guest Editors

The overall incidence and prevalence of melanoma and keratinocyte carcinoma, including basal cell carcinomas and squamous cell carcinomas, have increased in recent decades. Roughly one in every three newly diagnosed cancers is a skin cancer, and between 2 and 3 million keratinocyte carcinomas and more than 130,000 melanomas occur globally every year. The public health importance of skin cancer is enormous for all countries with a predominantly fair-skinned population. Epidemiologic research has identified preventable risk factors for the various types of skin cancer, while numerous intervention trials have explored the effects of targeted preventive strategies

This Special Issue invites the submission of papers on all these aspects related to public health and the prevention of skin cancer. Papers describing epidemiologic and public health studies on this topic are welcome, as are papers describing the design and implementation of targeted prevention programs and initiatives aiming at a reduction in skin cancer risk. Papers reporting original data from quantitative, qualitative, or mixed-methods studies as well as systematic reviews and meta-analyses are welcome.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
